

BLOK Trailers are double-width trailers which allow a single tug tractor to transport up to 8 TEU at once for high efficiency transfers around the dock.

The BLOK Trailer is perfectly suited to tandem lifting operations since it receives or feeds containers in perfect alignment for the lift – no time is lost waiting for two single trailers to get aligned. BLOK Trailers allow maximum efficiency for STS cranes.

Used in combination with lightweight **BLOK Spreaders** for tandem lifting and **BLOK Rigs** for twistlock handling they can increase handling speed by up to 4 times.

- Capacity:
 - Two 40ft containers side by side
 - Four 20ft containers in twin tandem
 - Up to 8 TEU in VTL units
 - 60tonne SWL
- Gooseneck or fore-carriage option
- 20ft option
- Guides fitted all round for easy alignment
- Trailer is same width as a straddle carrier
- Rocking beam running gear for smooth travelling and stability
- Solid rubber steel band reinforced tyres
